Understanding the Value of GIS in Statistics and Census

A story map

GIS for Official Statistics

Building the Foundation for your Nation

National government, ministries and agencies, need to collaborate and serve government and citizens through their National GIS program. Agencies key in developing a National GIS are the National Mapping and Statistical Organizations (NMOs and NSOs) as well as Land Management.

The Importance of National GIS

National GIS is important to help lay the foundation for a country's success. The programs these agencies run and the data they produce solve problems of national importance pertaining to socio-economic issues, public safety, health security and environment.

GIS: Helping Build the Foundation for your Nation

ArcGIS

An Integrated
Web GIS Platform

Providing mapping, analysis, data
management, and collaboration

Next Steps

1. **Download** White Paper on Modernization of NSO Business Process using GIS
<http://go.esri.com/l/82202/2015-12-03/nd2mb>
2. **Read** the Cape Verde case study
<http://www.esri.com/~media/Files/Pdfs/library/fliers/pdfs/cape-verde-cenus.pdf>
3. **Read** [The ArcGIS Book](#), “The Power of Apps” (chapter 7) & “Your GIS is Mobile” (chapter 8)
4. **Watch** [“Modernize Your Field Workflows Using Collector for ArcGIS”](#) webinar recording (60 min)
5. **Watch** [“Survey 123 for ArcGIS You Tube video”](#)
6. **For more information**— contact Linda Peters(lpeters@esri.com) or your local Distributor
