Schema for route centerline management

Centerline

*Polyline FC,
stores shape and geometry*

Information Model

Schema for route centerline management

Route(s) / Network

Polyline FC
Measure enabled

Centerline

Polyline FC,
stores shape and geometry

Information Model

Schema for route centerline management

Calibration Points 0 50 *Point FC, stores Measure values*

A horizontal light blue line with two yellow circular markers at each end. The left marker is labeled '0' and the right marker is labeled '50'.

Route(s) / Network *Polyline FC, Measure enabled*

A solid horizontal light blue line.

Centerline *Polyline FC, stores shape and geometry*

A dashed horizontal light blue line.

Types of Network

3 - Derived Network

Support for Multiple Linear Referencing Methods

Support for Multiple Linear Referencing Methods

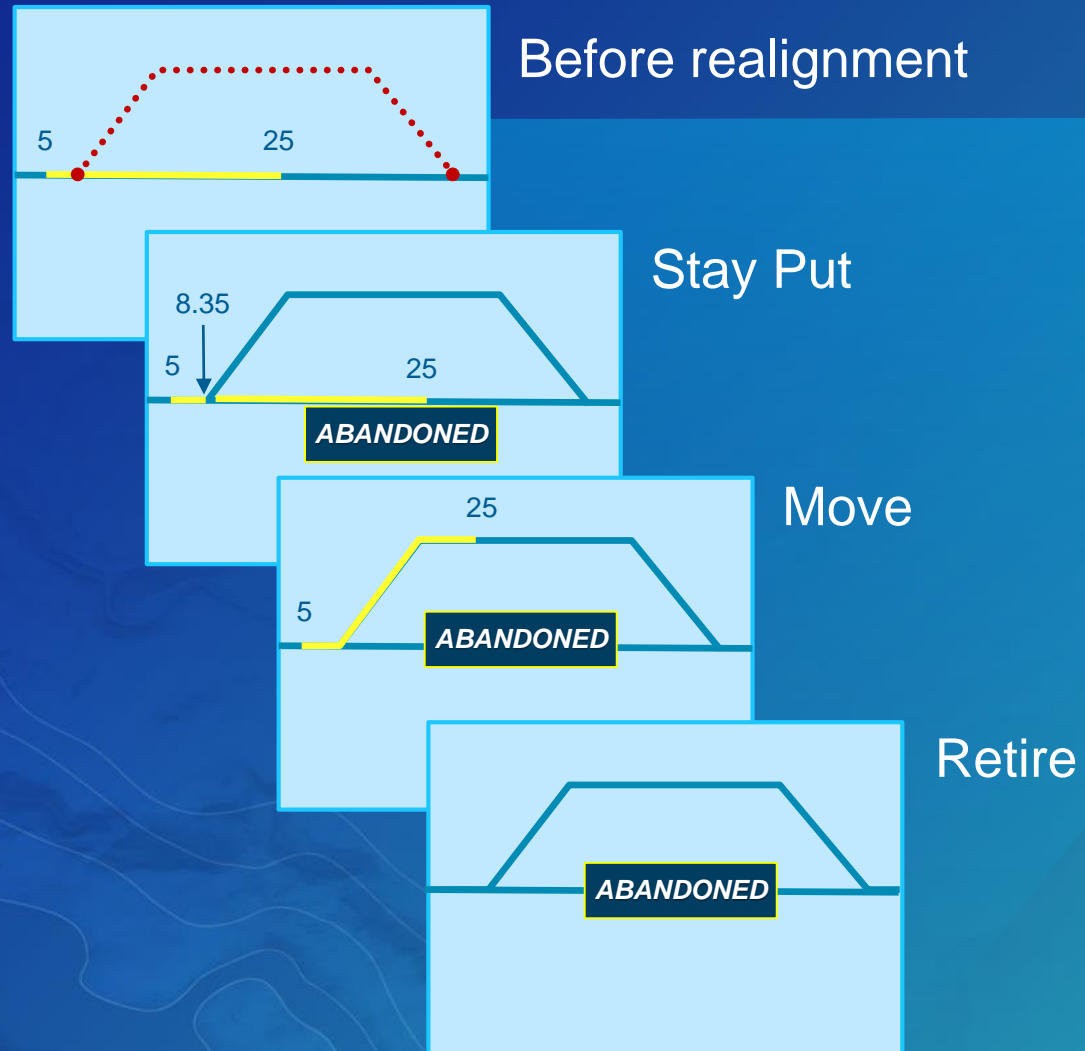

Event Location Methods

- Route and measure
- Stationing
- Referent and offset
 - Intersections
 - Events
 - Features
- Coordinates and offset

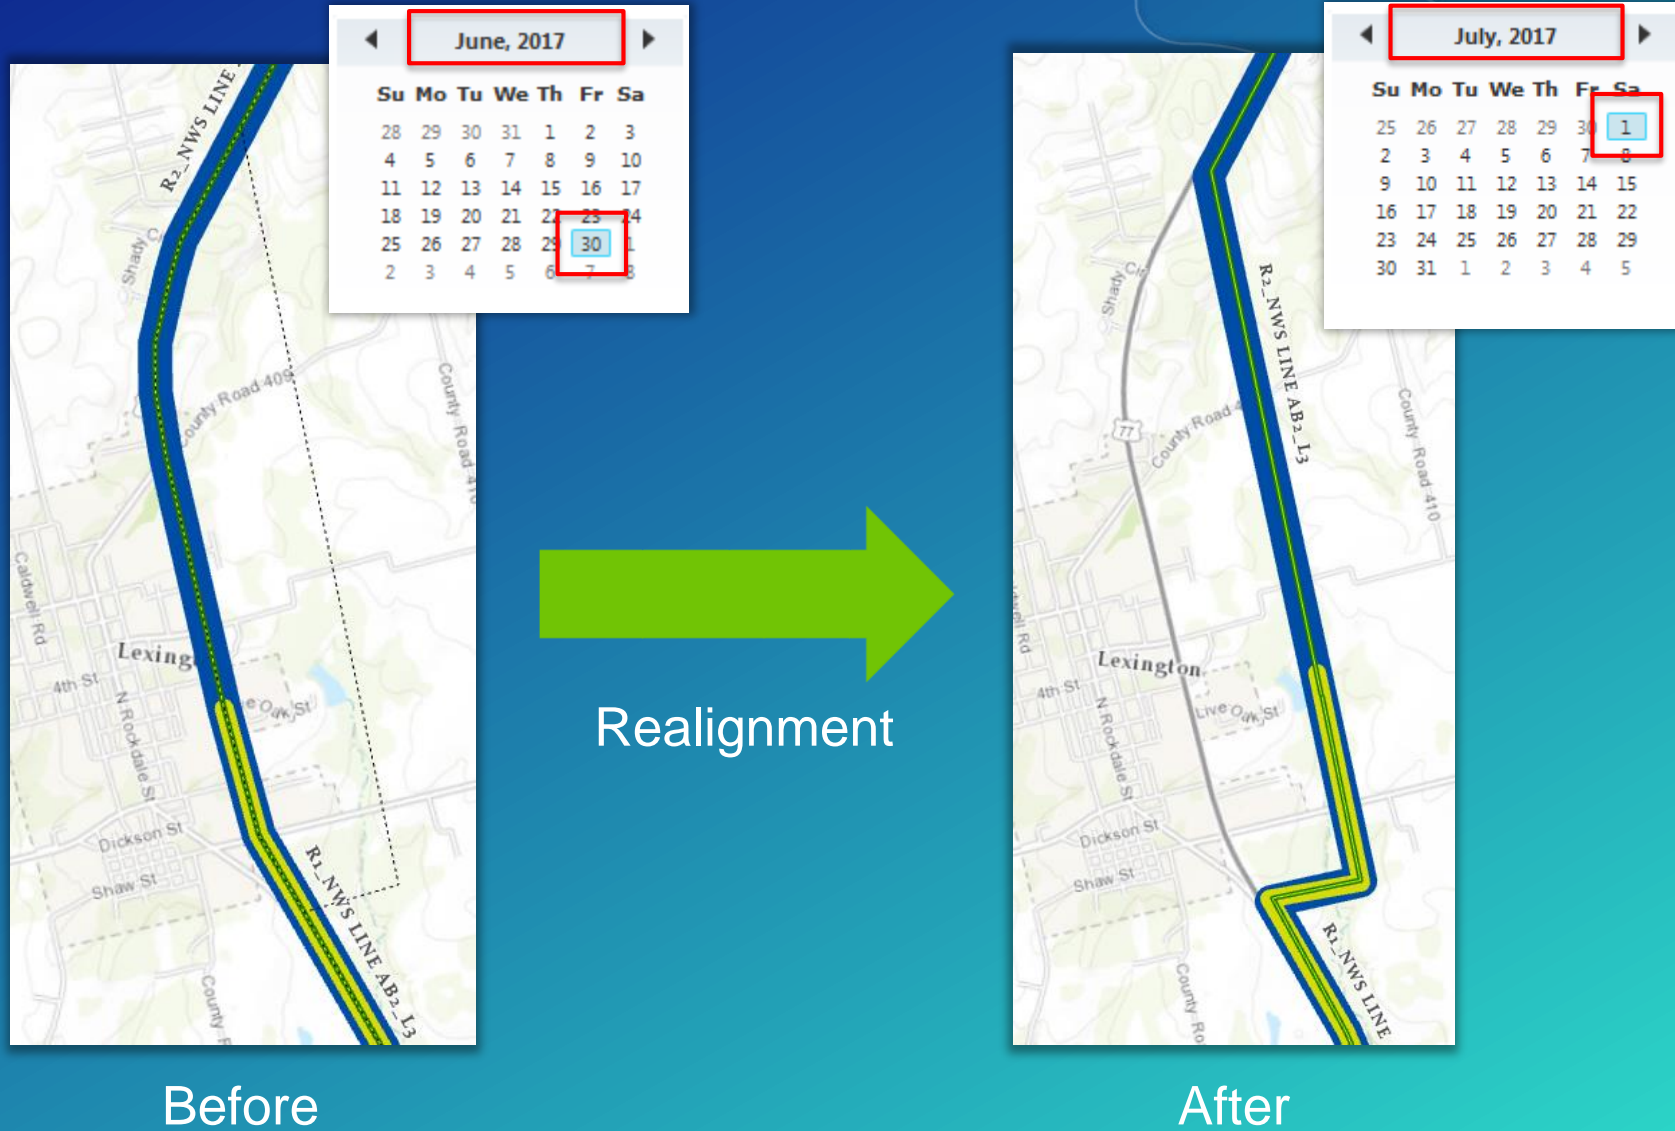

Event Measure Behaviors

When the LRS routes are edited, measure behavior rules can be applied to events.

Time Aware Model

Demo...

Configuration/Loading Process

LRS Configuration

- Create LRS
- Create Networks
- Create Events

Network Loading

- Load Routes
- Append Calibration Points
- Generate Routes

Event Loading

- Append Events

LRS Configuration

LRS Configuration

- Create LRS
- Create Networks
- Create Events

Network Loading

- Load Routes
- Append Calibration Points
- Generate Routes

Event Loading

- Append Events

- Append Calibration Points
- Generate Routes

Event Loading

- Append Events

Pipeline Referencing Data Migration Roadmap

Append Routes tool

- Load Routes in ArcGIS Pro
- GP tool to provide flexibility

3D Measure Calculation

- Calculate measures in 3D when Z values are present

LRS Hierarchy view

- Show LRS, Networks, and Events in ArcGIS Pro
