

Waste Industries Embraces Distributed GIS

Presented by
Kevin Stewart, GISP, Account Manager, GISi

WASTE INDUSTRIES

Who?

- Solid waste services company for more than 41 years
- Collection, transfer, disposal, and recycling services
- Commercial, industrial and residential customer

Problem

WASTE INDUSTRIES

- Support distributed workforce more efficiently
- Increase Operational Awareness

Solution

Part 1

Solution

Part 2

The screenshot displays the Waste Industries Route Explorer interface. At the top, the company logo and name are visible on the left, and the current branch location, 'Raleigh, NC', is shown on the right. A search bar is also present. The main area is a map of Raleigh, NC, with several orange routes overlaid. The right-hand panel, titled 'Route Explorer', contains the following controls:

- Find the route that best serves a customer by selecting from options below.**
- Select Product:** A dropdown menu with a 'Clear' button.
- Day of Week Filter:** A 'Clear' button and checkboxes for Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, and Sunday.
- Display Legend By:** Radio buttons for 'Day of week' and 'Route', with 'Route' selected.
- Display Package As:** Radio buttons for 'Zoom in enable' and 'Zoom out enable', with 'Zoom in enable' selected.
- Legend:** A section with the text 'No pickups match search criteria.'

WASTE INDUSTRIES

Expected Results

- Instant ROI from improved data management strategies
- Increased operation awareness
- Customer Service Reps will use the web tool for better assignment management and driver replacement activities.
- What can we do next?
