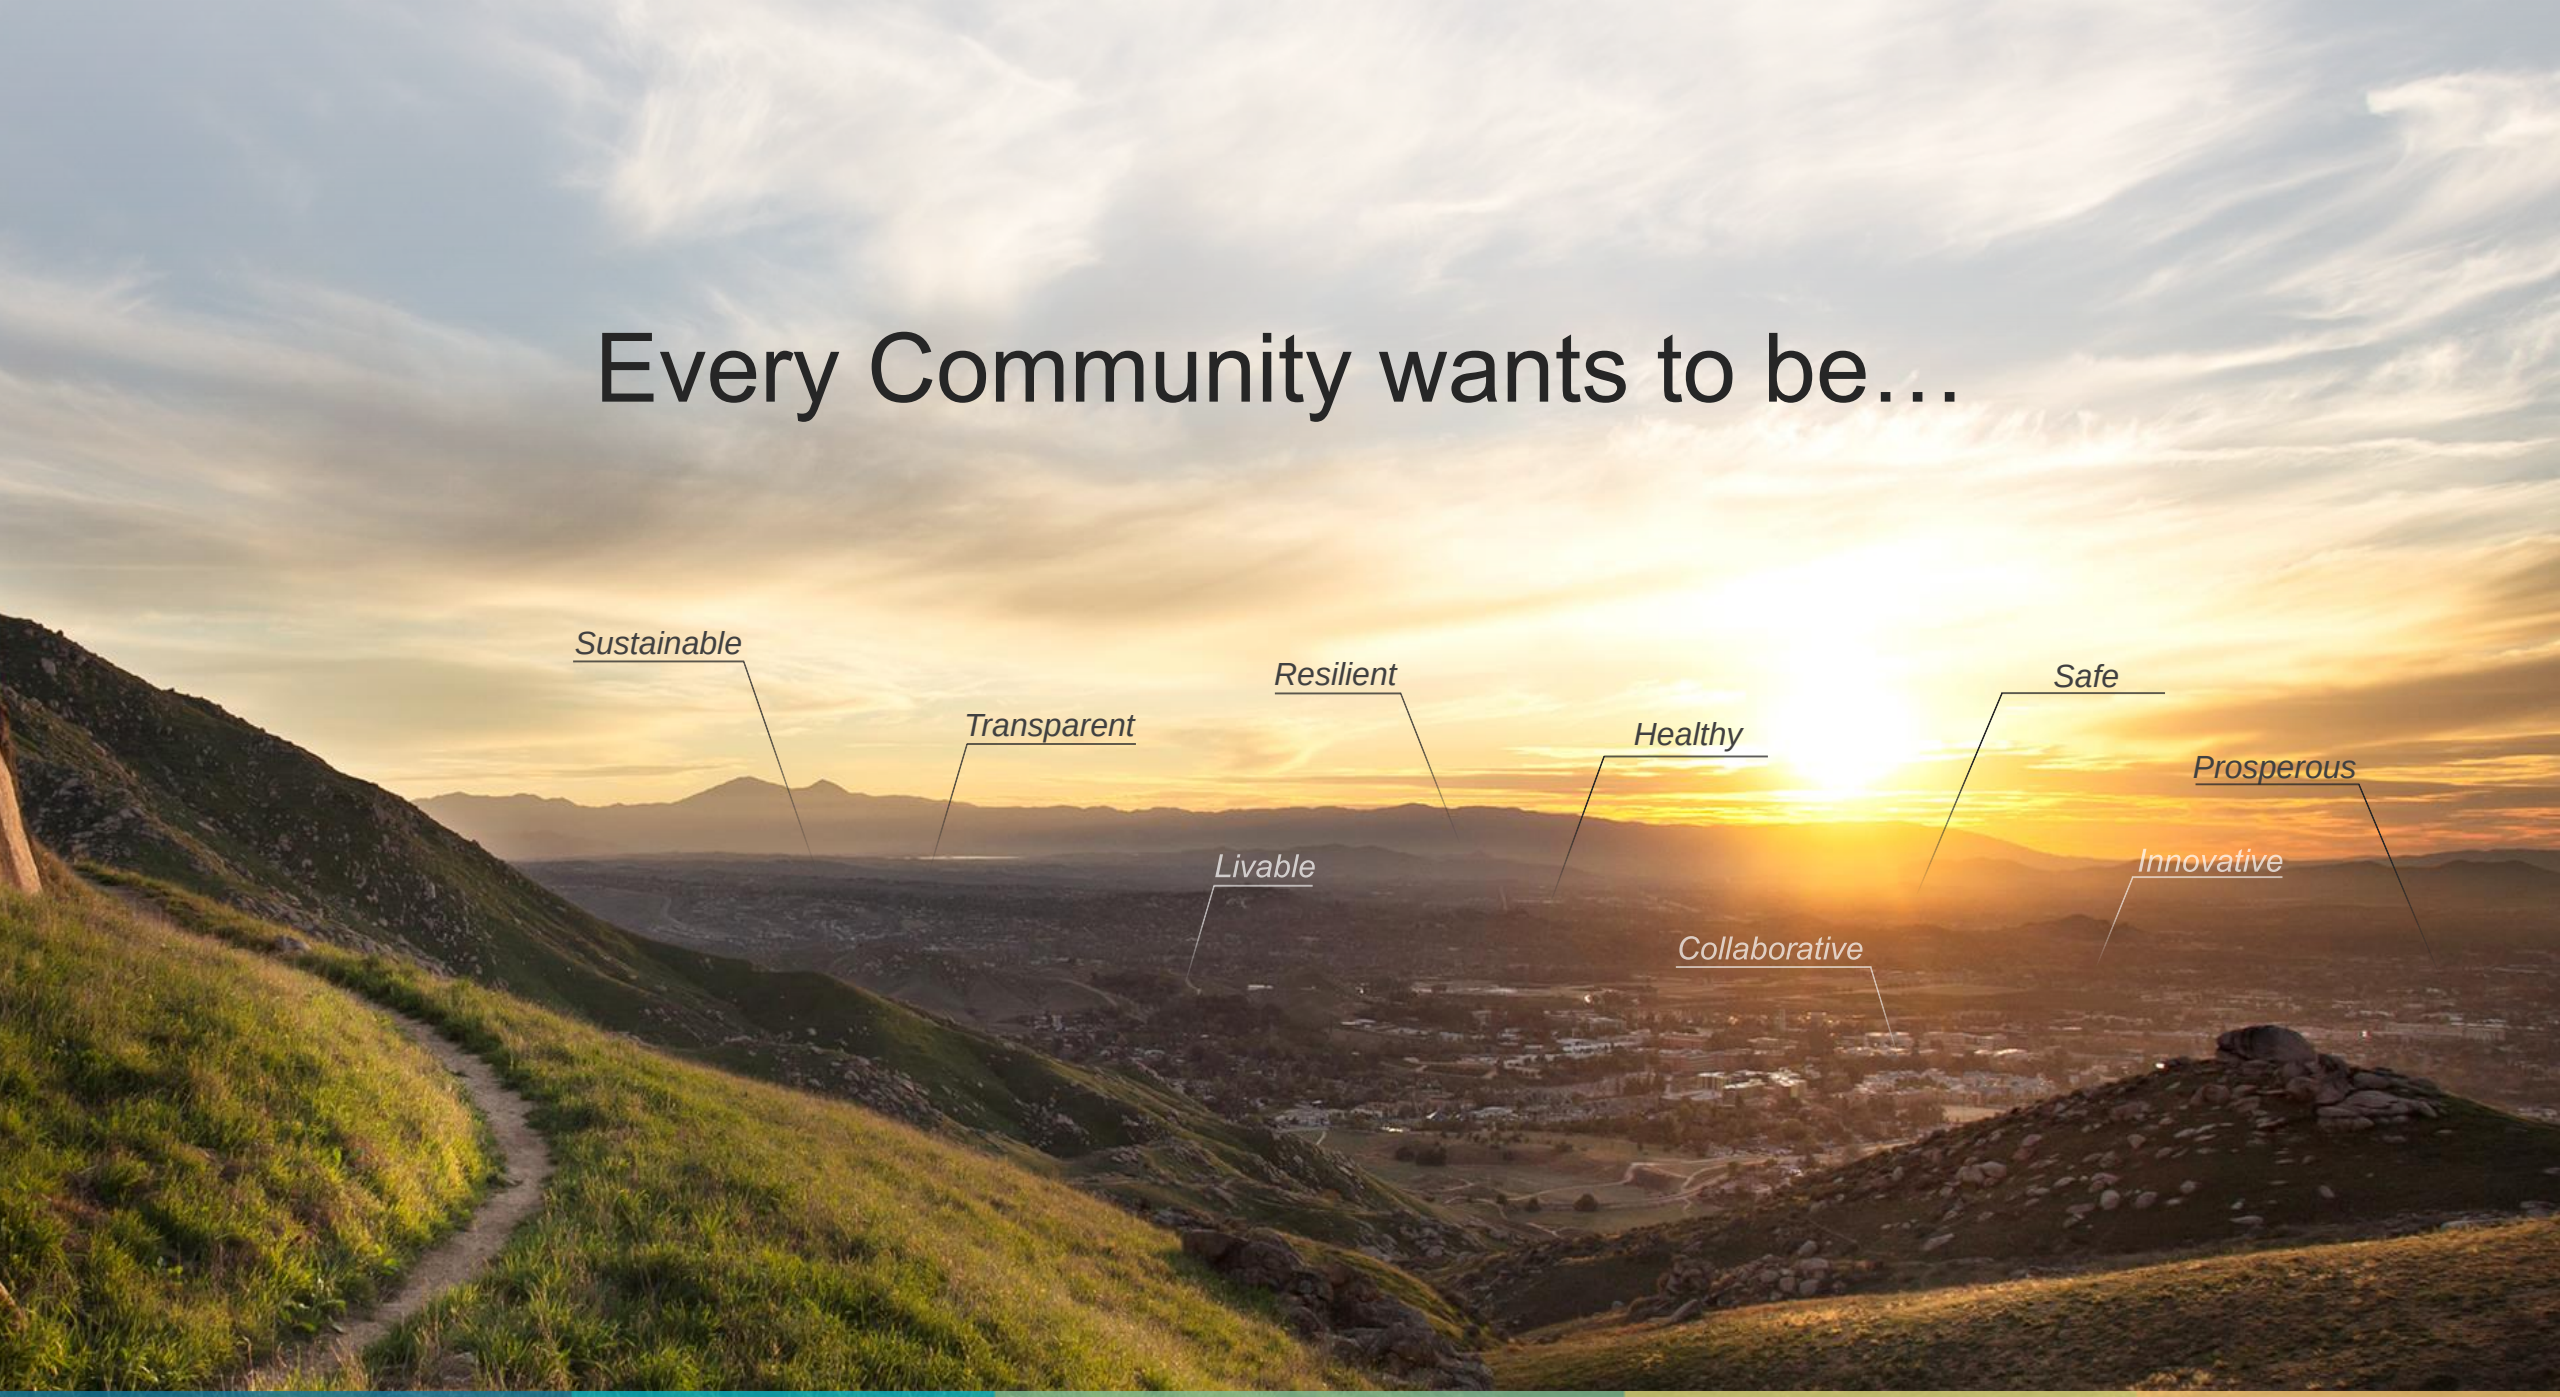
Every Community wants to be…



Aspirations get translated into actionable, real-world Initiatives

Engagement Maturity Path

Current State of Open Data

- Complete open data solution for operational tables and spatial data
  - 11,000+ organizations around the world
  - 115,000+ datasets shared as open data
  - 60,000,000+ downloads to date

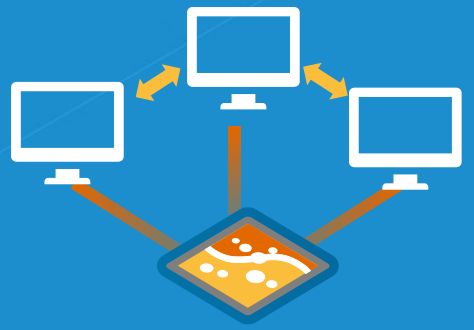
- Provide custom sites you control
  - Unlimited bandwidth and API Usage
  - No restriction on the number of datasets
  - Auto-generated downloads
  - Suite of applications to provide context
  - ArcGIS sharing model

Open Data Principles

Accessible

Discoverable

Explorable



Collaborative

1. Uses minimal resources and has a minimal impact on information workers
2. Successfully communicates meaning via data and information
3. Engages end users in a sustainable manner

Leverages existing services and familiar workflows

Open Data - No Wrong Door

What is Distributed Collaboration?

A way to share information and data with other organizations or deployments through a trusted environment.

…Extends beyond geographic & organizational boundaries.

…Allows teams to discover content as they work towards shared goals and initiatives.

Individuals

Organizations

Networks of Organizations

New at ArcGIS Enterprise 10.6

- Sync status reporting

When was my last completed sync?

When is my next sync scheduled?
