Pro Tasks

- **Tasks in ArcGIS Pro use cases:**
  - **Interactive tutorial:** Tasks can be used as a training tool for ArcGIS Pro itself or for organization-specific workflows.
  - **Implement a best-practice workflow:** Often, there is more than one way to accomplish an objective in ArcGIS Pro. If there is a specific workflow that produces the desired results, a task provides an efficient method for distributing that workflow to your users.
  - **Improve the efficiency of a workflow:** Tasks can improve the efficiency of workflows by controlling layer settings (for example, visibility or selectability), opening and closing views, or having embedded tools and commands.
