Using GIS for Confined Space Safety

ESRI Water Conference 2018

Kaitlin Szedlar – GIS Technician

Agenda

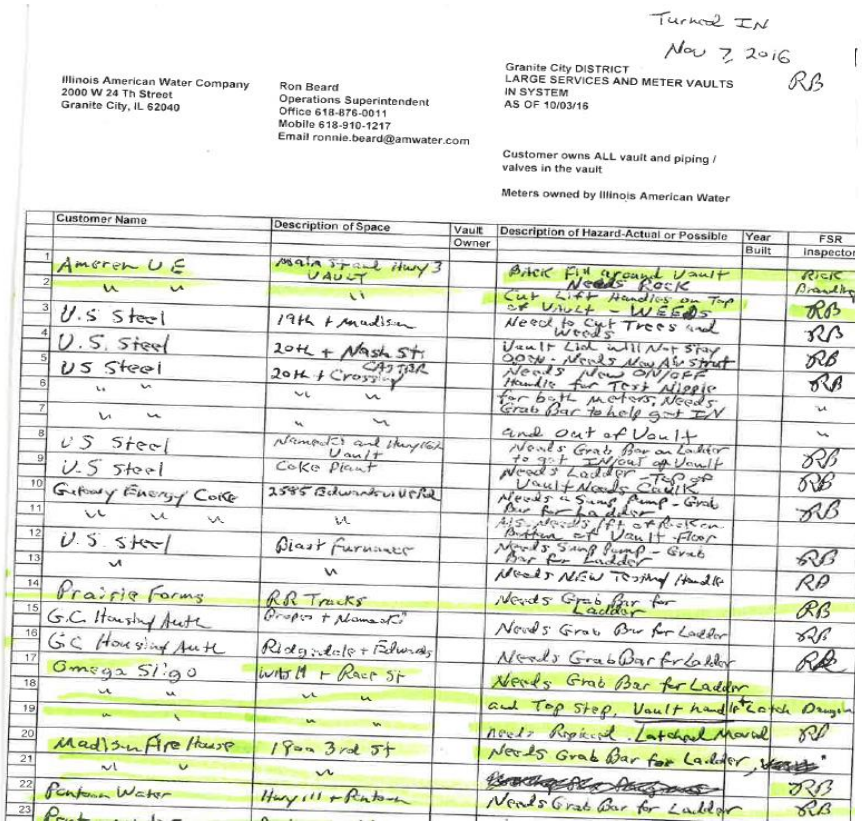
- Background
- Creation, Implementation, Management, & Continuous Improvement
- Confined Space Data : Current State vs Confined Space Safety Application
- Questions

Background

- Southern Division Health & Safety Committee
- Issue introduced by field crew members, district supervisors, & safety professionals:

- **At Illinois American Water large customer vaults are not company owned. However, we are required to enter the vaults & perform meter testing on an annual basis. Because we do not own and therefore are not responsible for the maintenance of these vaults, the condition of many of them has deteriorated in ways that present safety concerns to our employees.**

Paper Forms



Turned IN
Nov 7 2016 RB

Illinois American Water Company
2000 W 24 Th Street
Granite City, IL 62040

Ron Beard
Operations Superintendent

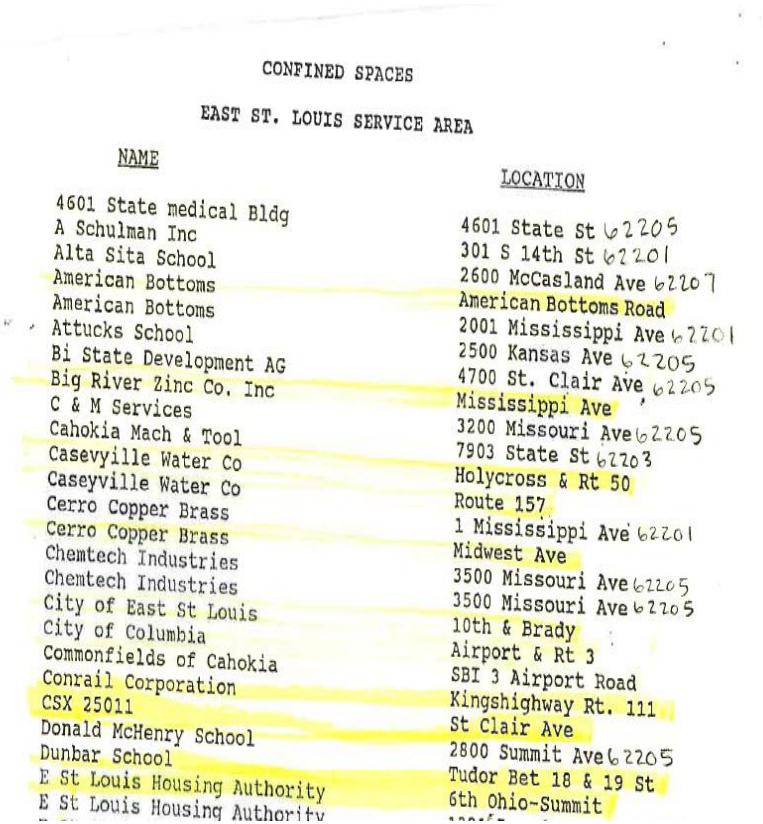
Granite City DISTRICT
LARGE SERVICES AND METER VAULTS
IN SYSTEM
AS OF 10/03/16

Customer owns ALL vault and piping / valves in the vault

Meters owned by Illinois American Water

	Customer Name	Description of Space	Vault Owner	Description of Hazard-Actual or Possible	Year Built	FSR Inspector
1	Ameren U E	Main St and Hwy 3 VAULT		Brick Rim around Vault Needs Rock		RICK Bradley
2	" "	"		Cut Lid Handles on Top of Vault - WEEDS		RB
3	U.S Steel	19th + Madison		Need to Cut Trees and Weeds		RB
4	U.S. Steel	20th + Nash St		Vault Lid will Not Stay OPEN - Needs New Arm Strut		RB
5	US Steel	20th + Crossing CAUTION		Needs New ON/OFF Handle for Test Nipple for both Meters; Needs Grab Bar to help get IN		RB
6	" "	" "				"
7	" "	" "		and Out of Vault		"
8	US Steel	Nameplate and Hwy 162 Vault		Needs Grab Bar on Ladder to get IN/out of Vault		RB
9	U.S Steel	Coke Plant		Needs Ladder - To get in Vault Needs Caulk		RB
10	Gateway Energy Coke	2585 Edwardsville Rd		Needs a Sump Pump - Grab Bar for Ladder		RB
11	" " "	"		Also Needs 4ft of Rock in Bottom of Vault Floor		
12	U.S Steel	Blast Furnace		Needs Sump Pump - Grab Bar for Ladder		RB
13	"	"		Needs NEW Toothy Handle		RB
14	Prairie Farms	RR Tracks		Needs Grab Bar for Ladder		RB
15	G.C. Housing Auth	Cooper + Nameoki		Needs Grab Bar for Ladder		RB
16	G.C Housing Auth	Ridgedale + Edwards		Needs Grab Bar for Ladder		RB
17	Omega Sligo	Wash + Race St		Needs Grab Bar for Ladder		RB
18	" "	" "		and Top Step, Vault handle to catch Danger		
19	" "	" "		Needs Replaced Latched Manual		RB
20	Madison Fire House	18th 3rd St		Needs Grab Bar for Ladder, ~~Needs~~		
21	" "	"		~~Brother Bar Assignment~~		RB
22	Pontoon Water	Hwy 111 + Pontoon		Needs Grab Bar for Ladder		RB
23	Pontoon					



CONFINED SPACES

EAST ST. LOUIS SERVICE AREA

NAME	LOCATION
4601 State medical Bldg	4601 State St 62205

Employee Experience/Knowledge

Creation

- **Acquire current state data and standardize as much as possible**
- **Geocode addresses of confined spaces (when possible)**
  - **Geocoding** : Input addresses, GIS generates a point for each address
  - This provided a starting point
  - The rest of the data will be created by end users

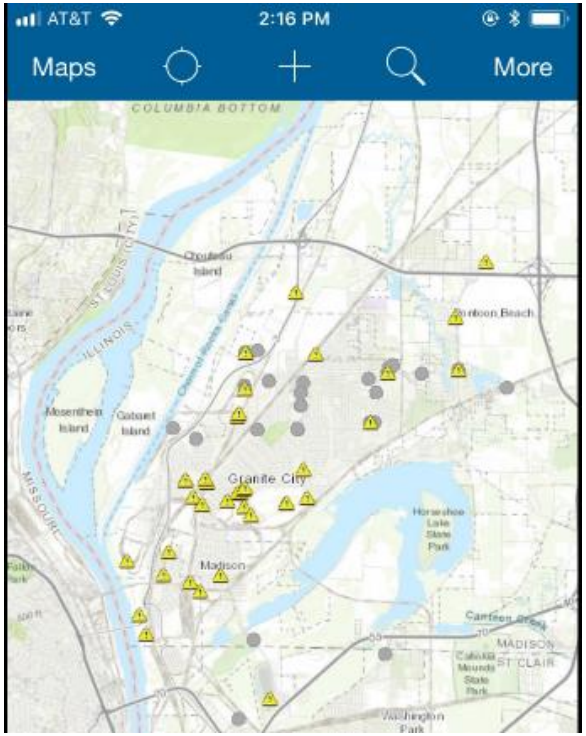
Creation

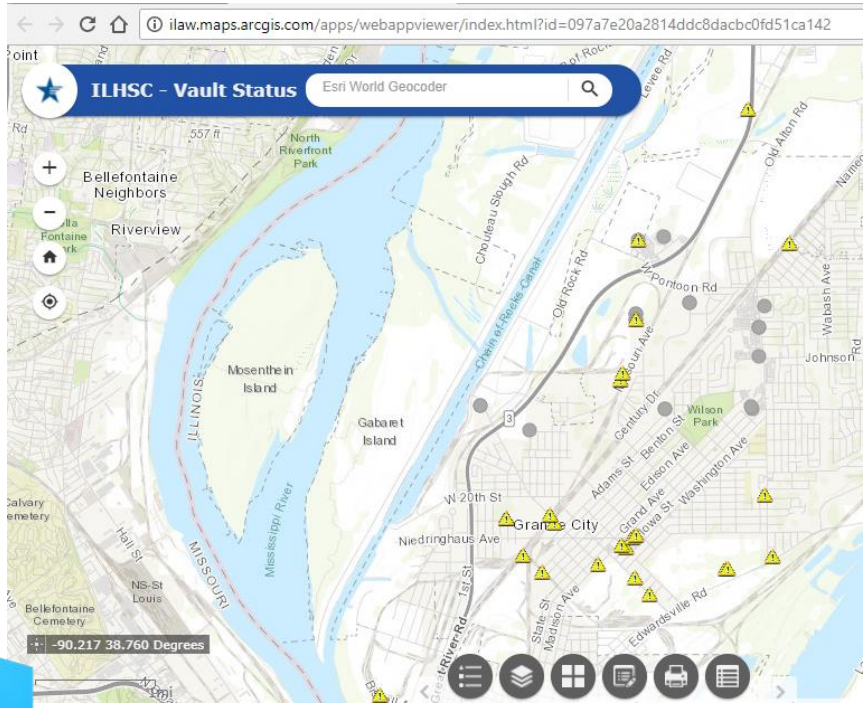
- **Work with safety professionals, managers, supervisors, and field crews to determine what attribute information is needed**

Address	City	District	Comments	Install Date	Vault Status
Vault ID	Name	Hyperlink	Company Owned	Creator	Edit Date
# of meters	Valve/Meter Size	Correction Request Letter Sent?	Permit Required?	Data Source Type	Safety Hazard Notes

Creation

- **Accessible on the web or a free app (mobile device or tablet)**



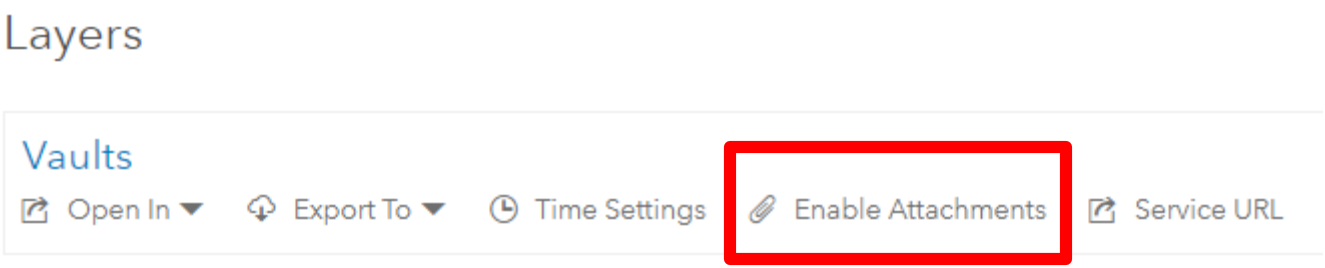


- **Create a web map in ArcGIS Online – No coding required**

Creation

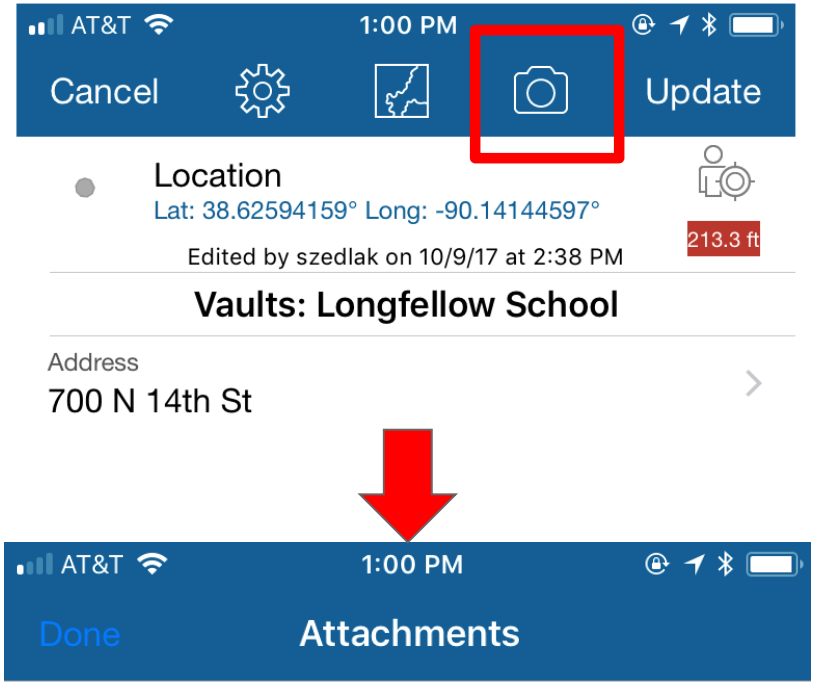
- **Enable Attachments**
- **Done in ArcGIS Online**
  - Hosted Feature service
  - View Item Details
  - “Enable Attachments”

- **Allows users to add and view images and/or documents**



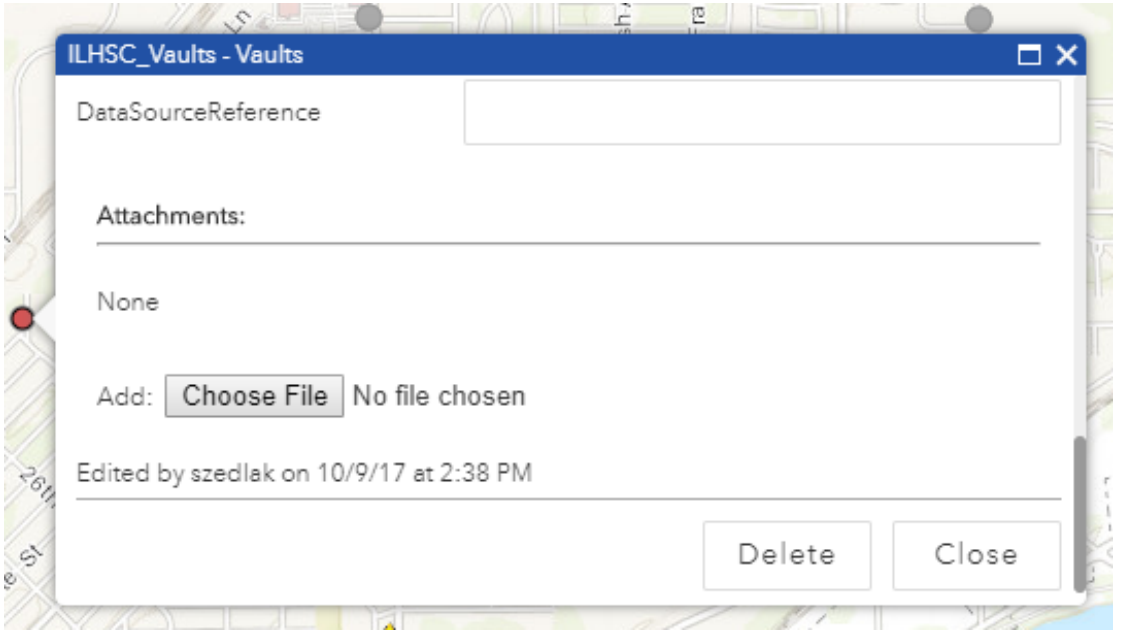
Images

- **Users can add images using the camera on their smartphone or tablet in the field**



Images

- Users can add images or documents using the web application
- Ex. Image of broken lid
- Ex. Confined space entry permit document



Management

- Creation, Management, and Training were all done by a single user
- Once created, data is owned by the end user and requires very little maintenance
- A backup of the data is created monthly

Training/Deployment

- Scheduled at the beginning of regularly scheduled annual inspections
- ½ day of training
- 30 minutes in the office reviewing the basics of the applications
- Hands on training in the field during inspection route for remainder of the session

Office Use

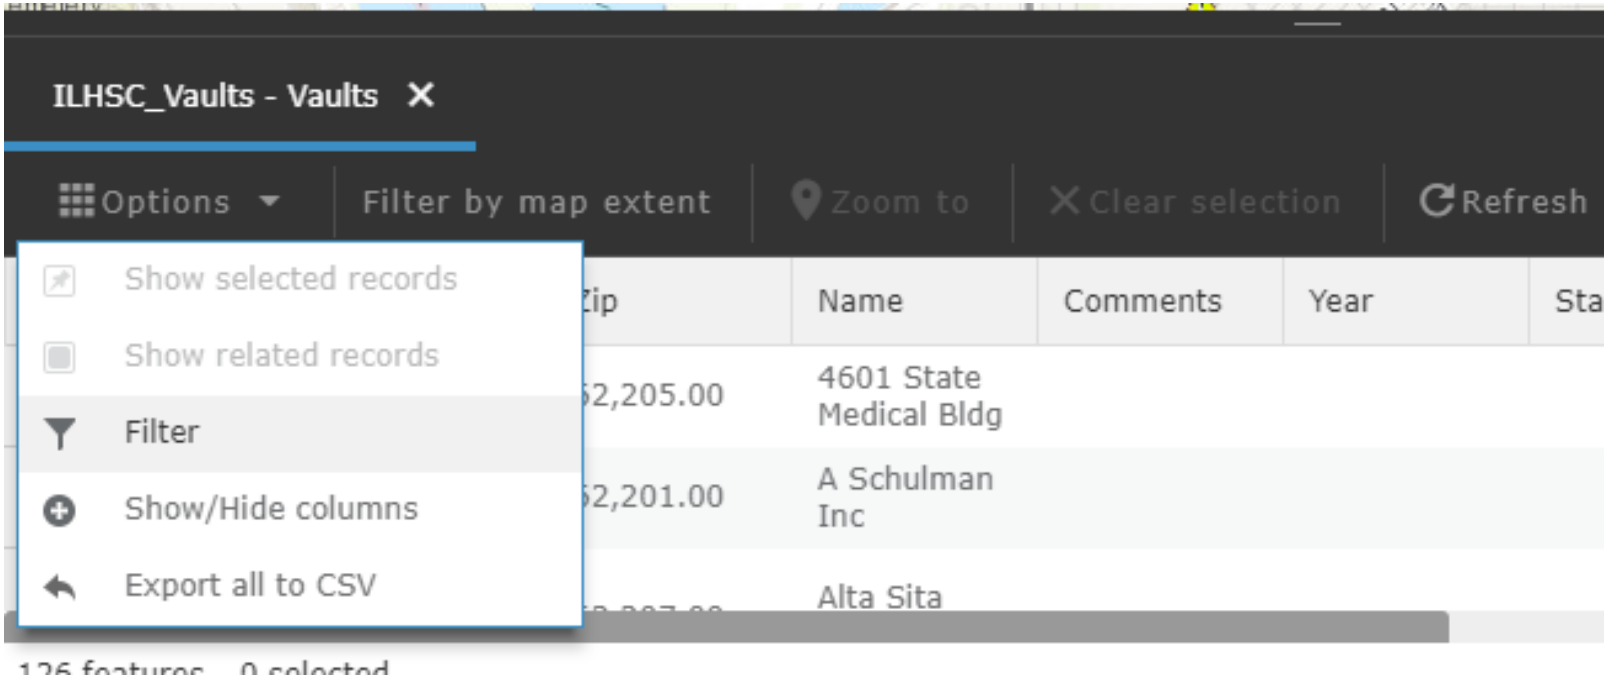
- **State decision makers and safety professionals may want to see statewide data, while local supervisors may only be concerned with data for the specific town(s) that they manage.**



Current State

- Records stored in different formats in each district : Excel spreadsheets, paper forms, & employee knowledge
- Vulnerable to aging workforce
- Difficult for safety professionals & management to view statewide data

GIS Confined Space Safety App

- Single repository for confined space information
- Information readily available for field crews, safety professionals, & management to view or Export a report to Excel
- Crews can check notes from prior year to be more prepared for the job from a mobile phone, computer, or tablet
- Employees are empowered to add new assets or change attribute information

Benefits

Short Term

- Field employees are more aware of hazards and have a place to document new developments in real time using a computer, smartphone, or tablet

Long Term

- Office managers and safety professionals can easily generate reports within the application and leverage this information to work with vault owners toward a long term solution to the safety concerns

Continuous Improvement

- As each new district goes live we receive new attribute suggestions and other recommendations
- This platform makes these improvements simple and allows us to be responsive to our users needs
